

Tableau Integration

The screenshot shows the Tableau desktop application. At the top, there's a navigation bar with 'File', 'Edit', 'View', 'Dashboard', 'Analysis', 'Tableau', 'Help', and a search bar. Below the navigation bar is a toolbar with icons for zoom, refresh, and other functions. The main area contains several visualizations, including a bar chart, a line chart, and a map. On the left side, there's a sidebar with a tree view of 'Feature Settings' (Analytics, Tableau, Decision Tables), 'User Interface' (Loaded Console, Tabs, Rename Tabs and Labels), and a global search bar. A status bar at the bottom shows '24/7000' and other system information.

New Custom Object Tab

The screenshot shows the Salesforce Setup interface under 'Object Manager'. A modal window titled 'New Custom Object Tab' is open. It has a step-by-step process: 'Step 1. Enter the Details'. The 'Object' dropdown is set to '-None-' and the 'Tab Style' dropdown is set to '-None-' (both highlighted with red boxes). A search bar below the dropdowns shows 'HandsMen Customer'. A note says '(Optional) Choose a Home Page Custom Link to show as a splash page the first time your users click on this tab.' Below the dropdowns is a 'Description' input field. At the bottom right of the modal is a 'Next Step' button (highlighted with a red box).

Custom Tabs

The screenshot shows the Salesforce Setup interface under 'Object Manager'. A search bar at the top has 'tabs' entered. A sidebar on the left shows 'User Interface' with 'Rename Tabs and Labels' selected. A modal window titled 'Tabs' is open, showing a section titled 'Custom Tabs'. It says 'You can create new custom tabs to extend Salesforce functionality or to build new application functionality.' Below this are sections for 'Custom Object Tabs', 'Web Tabs', 'Visualforce Tabs', 'Lightning Component Tabs', and 'Lightning Page Tabs', each with a 'New' button and a 'What Is This?' link. A note at the bottom says 'Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.'

SETUP New Custom Object

Custom Object Definition Edit

Save Save & New Cancel

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label	Example: Account
Plural Label	Example: Accounts
Starts with vowel sound <input type="checkbox"/>	

The Object Name is used when referencing the object in the API.

Object Name	Example: Account
Description	

Context Sensitive Help Setting: Open the standard Salesforce.com Help & Training window Open a window using a Visualforce page

Content Name: None

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is required.

Record Name	Example: Account Name
Data Type	Text <input type="button" value="Warning: If you plan to insert a high volume of records in this object, via the API for example, use the Text data type."/>

Navigation Items

Choose the items to include in the app, and arrange the order in which they appear. Users can personalize the navigation to add or move items, but users can't remove or rename the items that you add. Some navigation items are available only for phone or only for desktop. These items are dropped from the navigation bar when the app is viewed in a format that the item doesn't support.
